

GIX Nexus Telecom and Power

An Ethiopian-owned telecommunications and power engineering company delivering reliable, innovative, and cost-effective infrastructure solutions across Ethiopia – from site surveys and installation to commissioning, maintenance, and 24/7 technical support.

COMPANY PROFILE

VENDOR REGISTRATION READY

Managing Director's Message

Our Foundation

"We are committed to delivering dependable, safe, and high-quality telecommunications and power engineering services that support the growth of Ethiopia's communications infrastructure."

At GIX Nexus Telecom and Power, our goal is to build long-term partnerships by providing professional solutions tailored to our clients' operational needs. As Managing Director, I bring practical experience in satellite communications (SATCOM), including the installation, operation, preventive maintenance, and corrective maintenance of satellite communication systems and related telecommunications infrastructure. Throughout my career, I have developed a strong understanding of telecommunications engineering, RF systems, VSAT technology, and technical support, enabling our company to provide reliable and effective solutions.

Our technical capability is further strengthened by qualified personnel, including a Cisco Certified professional, whose networking expertise supports the design, installation, configuration, and maintenance of modern communication networks. This combination of satellite communications experience and industry-recognized networking skills enables us to deliver integrated telecommunications solutions to our clients.

We are committed to operating with integrity, professionalism, safety, and quality in every project we undertake. Whether supporting telecommunications operators, government institutions, embassies, NGOs, or private organizations, we strive to exceed expectations through technical excellence, responsive service, and continuous improvement.

Thank you for taking the time to learn about GIX Nexus Telecom and Power. We look forward to the opportunity to work with your organization and contribute to the success of your telecommunications and power infrastructure projects.

Integrity

Honest, transparent, and accountable in every engagement

Safety

Zero-accident commitment on every project site

Excellence

International standards, local expertise

Company Overview

GIX Nexus Telecom and Power is an Ethiopian telecommunications and power engineering company dedicated to delivering reliable, innovative, and cost-effective engineering solutions for the telecommunications industry. The company specializes in the installation, maintenance, commissioning, and technical support of telecommunications infrastructure and power systems, serving both public and private sector clients across Ethiopia.

Our core expertise includes Outdoor and Indoor Telecommunications Facilities Installation and Maintenance, Fiber Optic Networks, VSAT and Satellite Communication Systems, Microwave Radio Systems, RF Engineering, Structured Cabling, and Telecommunications Power Systems. We provide end-to-end services ranging from site surveys and system installation to testing, commissioning, preventive maintenance, corrective maintenance, and technical support 24/7.

GIX Nexus Telecom and Power is committed to delivering services that meet international engineering standards while ensuring safety, quality, and operational excellence. Our team combines practical field experience with technical knowledge to provide dependable solutions that support the expansion and reliability of telecommunications infrastructure.

We aim to establish long-term partnerships with telecommunications operators, equipment manufacturers, government institutions, embassies, international organizations, internet service providers, and private enterprises. Through professionalism, integrity, innovation, and customer-focused service, we strive to become a trusted engineering partner contributing to Ethiopia's digital transformation and infrastructure development.

Our Foundation

At GIX Nexus Telecom and Power, we believe that strong communication networks and dependable power systems are the foundation of sustainable economic growth. We are dedicated to helping our clients achieve their objectives by delivering safe, efficient, and high-quality engineering services with a commitment to continuous improvement and customer satisfaction.

7+

Service Domains

Comprehensive telecom and power engineering coverage

24/7

Round-the-clock maintenance and fault response

100%

Safety-first approach on every project

Vision, Mission & Core Values

Our Vision

To become one of Ethiopia's leading telecommunications and power engineering companies, recognized for quality, innovation, reliability, and customer satisfaction.

Our Mission

- Deliver high-quality telecommunications engineering services
- Build long-term partnerships with clients
- Provide innovative and reliable technical solutions
- Promote safety, integrity, and professionalism
- Contribute to the growth of Ethiopia's digital infrastructure

Core Values

Time-to-Market Focus

We understand that time-to-market is the most critical factor, and we make sure all projects are delivered on time.

Quality Workmanship

We deliver services in accordance with industry best practices, ensuring accuracy, reliability, and long-term performance.

Safety First

We are committed to maintaining a safe working environment by following HSEQ standards on every project.

Customer-Focused Approach

We work closely with our clients to understand their requirements and provide responsive, cost-effective, and dependable solutions.

Integrity & Professionalism

We conduct our business with honesty, transparency, accountability, and respect, building lasting relationships with our clients and partners.

Continuous Improvement

We continuously develop our technical capabilities, invest in modern tools and technologies, and encourage ongoing professional training.

Service Portfolio

GIX Nexus Telecom and Power provides comprehensive telecommunications and power engineering services, delivering reliable solutions that support the installation, operation, and maintenance of modern communication networks.

Telecommunications Infrastructure

- Outdoor & Indoor Facilities Installation and Maintenance
- Telecom Equipment Installation and Commissioning
- Site Survey and Technical Support

Fiber Optic Solutions

- Fiber Optic Cable Installation
- Fiber Optic Splicing and Termination
- Fiber Optic Testing and Troubleshooting
- Preventive and Corrective Maintenance

Satellite & Wireless Communications

- VSAT Installation and Maintenance
- Satellite Communication Systems
- Microwave Radio Installation and Alignment
- RF Equipment Installation and Maintenance

Network Infrastructure

- Structured Cabling Systems
- LAN and WAN Infrastructure Installation
- Network Rack Installation and Cable Management
- Network Testing and Commissioning

Telecom Power Systems

- DC Power System Installation
- Rectifier and UPS Installation
- Battery Bank Installation and Replacement
- Earthing and Lightning Protection Systems

Maintenance & Technical Support

- Preventive and Corrective Maintenance
- Emergency Fault Response
- Equipment Replacement and Upgrades
- Technical Inspection and Performance Testing

Outdoor Telecommunications Deployment

GIX Nexus provides professional outdoor telecommunications services supporting telecom operators, system integrators, and infrastructure contractors. Our experienced technical team supports projects from site survey and installation through commissioning and ongoing maintenance, ensuring reliable communication infrastructure deployment.

Telecom Site Installation

BTS/NodeB/eNodeB/5G site installation support, outdoor cabinet installation, radio equipment mounting, antenna installation and alignment, feeder cable installation, RET system installation, site integration support, and commissioning assistance

Tower & Antenna Systems

Telecom tower installation support, antenna mounting and replacement, microwave dish installation, antenna azimuth and elevation alignment, tower inspection and maintenance, and cable ladder and support installation

Fiber Optic Outdoor Networks

Underground and aerial fiber installation, fiber cable pulling and routing, joint closure installation, fiber splicing, OTDR testing, fiber fault troubleshooting, and last-mile fiber deployment

Microwave & Radio Communication

Point-to-point microwave links, point-to-multipoint wireless systems, radio installation and configuration support, link alignment and optimization, and RF signal testing

Satellite Communication (VSAT)

VSAT antenna installation, dish alignment and commissioning, BUC/LNB replacement, satellite modem installation, RF troubleshooting, and earth station maintenance support

Outdoor Power & Infrastructure

DC power systems, rectifier installation support, battery bank installation, solar-powered telecom sites, outdoor equipment cabinets, and grounding and lightning protection

Preventive & Corrective Maintenance: Telecom site inspections, equipment replacement, fault diagnosis, emergency field response, and network availability improvement.

Indoor Telecom, Fiber & RF Engineering

Indoor Telecommunications

GIX Nexus provides comprehensive indoor telecommunications solutions designed to support modern communication requirements for commercial, industrial, and government facilities. Our services include structured cabling, fiber optic networks, indoor wireless coverage solutions, telecom equipment installation, and network infrastructure support.

- **Structured Cabling:** Cat6/Cat6A/Cat7 network cabling, fiber optic indoor cabling, patch panel installation and termination, rack and cabinet installation, cable management and labeling, Fluke testing and certification, and network outlet installation
- **Indoor Mobile Coverage:** Indoor DAS (Distributed Antenna System) installation, small cell deployment, indoor antenna installation, RF cable routing, signal coverage improvement, and RF testing and optimization support
- **Enterprise Network Infrastructure:** LAN/WAN installation, switch and router installation support, wireless access point deployment, network rack setup, data center cabling, and equipment relocation and replacement
- **Telecom Equipment Installation:** Indoor telecom cabinet installation, rack-mounted equipment installation, power distribution units (PDU), optical distribution frames (ODF), patch panel installation, and equipment grounding
- **Security & Low Voltage Systems:** CCTV network infrastructure, access control cabling, public address system cabling, building management system (BMS) cabling, ELV system integration support, and generator installation and maintenance
- **Maintenance & Technical Support:** Preventive maintenance, network fault troubleshooting, cable repair and replacement, equipment inspection, and technical support services

Fiber Optic & VSAT Solutions

GIX Nexus delivers reliable fiber optic solutions covering network installation, splicing, testing, commissioning, and maintenance. Our experienced technical team supports telecom operators and infrastructure partners with high-quality fiber deployment services, ensuring reliable, high-performance communication networks.

GIX Nexus provides end-to-end VSAT and satellite communication support services, including installation, commissioning, RF troubleshooting, preventive maintenance, and technical field support. Our skilled engineers and technicians help organizations maintain reliable satellite connectivity in urban, remote, and challenging environments.

RF Engineering

GIX Nexus delivers RF engineering services covering installation, testing, commissioning, troubleshooting, and maintenance of wireless and satellite communication systems. Our RF specialists support telecom operators and technology partners by ensuring reliable RF performance, optimized communication links, and high network availability.

- Telecom rollout projects
- Satellite communication deployments
- Earth station maintenance contracts
- Microwave backhaul projects
- Wireless network expansion
- Field engineering assignments
- System integration activities

Technical Capabilities, HSEQ & Team

HSEQ Policy

GIX Nexus is committed to delivering telecommunications and infrastructure services with the highest standards of Health, Safety, Environment, and Quality (HSEQ) performance. We believe that protecting our employees, customers, contractors, the public, and the environment is a fundamental responsibility. We are committed to conducting all activities safely, professionally, and in compliance with applicable laws, industry standards, and customer requirements. Safety is our highest priority.

Zero Accident Objective

Safe Working Procedures

PPE Compliance

Electrical Safety

Working at Height Safety

Environmental Protection

Continuous Safety Training

Organization Structure

Technical Personnel

GIX Nexus Telecom and Power is supported by a team of qualified and dedicated professionals with experience in telecommunications infrastructure, satellite communications, network systems, and power engineering. Our technical team is committed to delivering safe, reliable, and high-quality services in accordance with industry standards and client requirements.

- ➔ **Managing Director**
Provides strategic leadership and technical oversight with practical experience in satellite communications (SATCOM), telecommunications systems, RF engineering, and project coordination.
- ➔ **Telecommunications Engineer**
Responsible for planning, supervising, installing, testing, commissioning, and maintaining telecommunications infrastructure and network systems.
- ➔ **Cisco Certified Network Professional**
Provides expertise in network installation, configuration, troubleshooting, routing, switching, and network security to ensure reliable communication systems.
- ➔ **Fiber Optic Technician**
Specializes in fiber optic cable installation, splicing, termination, testing, fault diagnosis, and maintenance.
- ➔ **OSP (Outside Plant) Technician**
Performs installation and maintenance of outdoor telecommunications infrastructure, including cable routing, equipment installation, and preventive maintenance.
- ➔ **Telecommunications Technician**
Supports the installation, testing, commissioning, and maintenance of indoor and outdoor telecommunications equipment and communication networks.
- ➔ **HSEQ Representative**
Promotes compliance with health, safety, environmental, and quality requirements by implementing safe work practices and supporting continuous improvement.

Our technical personnel participate in ongoing training to maintain their knowledge of current technologies, industry standards, and best practices, enabling GIX Nexus Telecom and Power to deliver dependable engineering solutions for telecommunications and power infrastructure projects.

Equipment, Target Clients & Why Choose Us

Equipment & Instruments

GIX Nexus Telecom and Power is equipped with essential tools and test instruments to support the installation, testing, commissioning, and maintenance of telecommunications infrastructure. Our equipment enables us to deliver reliable, safe, and efficient engineering services while maintaining high standards of quality.

Test Instruments: Digital Multimeters, Cable Finder, Tone Generator, Network Cable Testers

Installation Tools: Electric Hammer Drill, Technician Hand Tool Kits, Cable Crimping Tools, Cable Cutters and Stripping Tools, Extension Ladders, Networking Tools

Safety Equipment: Safety Helmets, Safety Harnesses, Reflective Safety Vests, Safety Gloves, Safety Boots, Safety Glasses and First Aid Kit

i Specialized tools and test equipment will be procured as required to meet specific project requirements and client specifications. GIX Nexus Telecom and Power is committed to maintaining its equipment in good working condition and continuously investing in modern tools and test instruments to support the delivery of high-quality telecommunications engineering services.

Target Clients

We provide telecommunications and power engineering services to a wide range of public and private sector organizations. We are committed to building long-term partnerships by delivering reliable, safe, and high-quality engineering solutions tailored to our clients' operational requirements. Our target clients include:

- Telecommunications Network Operators
- Telecommunications Equipment Vendors
- Internet Service Providers (ISPs)
- Government Ministries and Public Institutions
- Utility Companies
- International Organizations and United Nations Agencies
- Embassies and Diplomatic Missions
- Non-Governmental Organizations (NGOs)
- Banks and Financial Institutions
- Data Centers
- Military (Defence)
- Universities and Educational Institutions
- Commercial and Industrial Organizations
- Engineering, Procurement, and Construction (EPC) Contractors

We welcome opportunities to work as a contractor or subcontractor, supporting the planning, installation, commissioning, maintenance, and upgrading of telecommunications infrastructure and power systems throughout Ethiopia.

Why Partner with Us?

Qualified Technical Team

Experienced professionals with practical expertise in telecommunications, satellite communications (SATCOM), RF engineering, fiber optic systems, and network infrastructure.

Reliable Project Delivery

We emphasize careful planning, efficient execution, and timely completion while maintaining high quality standards.

Future Objectives & Contact

Our company is committed to sustainable growth and continuous improvement. Our future objectives are focused on strengthening our technical capabilities, expanding our services, and becoming a trusted telecommunications and power engineering partner in Ethiopia and the East African region.

01	02
Expand Operations	Build Partnerships
Expand our operations to serve clients throughout Ethiopia.	Build long-term partnerships with telecommunications operators, equipment vendors, government institutions, embassies, NGOs, and private sector organizations.
03	04
Enhance Technical Capacity	Invest in Technology
Enhance our technical capacity through continuous training and professional development.	Invest in modern tools, test instruments, and engineering technologies to improve service delivery.
05	06
Maintain HSEQ Standards	Deliver Innovative Solutions
Maintain the highest standards of Health, Safety, Environment, and Quality (HSEQ) across all projects.	Deliver innovative, reliable, and cost-effective telecommunications and power engineering solutions.
07	08
Achieve Industry Certifications	Support Digital Transformation
Achieve recognized industry certifications to strengthen our quality management systems and operational excellence.	Support Ethiopia's digital transformation by contributing to the development and maintenance of modern telecommunications infrastructure.

Through these objectives, GIX Nexus Telecom and Power aims to become a recognized leader in telecommunications infrastructure installation, maintenance, and engineering services, delivering lasting value to our clients and stakeholders.
