GIX NEXUS

TELECOM AND POWER

Reliable Telecommunications & Engineering Solutions

Delivering professional SATCOM, VSAT, RF, fiber optic, indoor and outdoor telecommunications infrastructure, networking and power solutions through experienced technical teams and reliable field execution.

ABOUT GIX NEXUS

Your Trusted Telecommunications & Engineering Partner

GIX Nexus Telecom and Power is an Ethiopia-based telecommunications and engineering services company specializing in Satellite Communications, VSAT, RF, Telecom Infrastructure, Fiber Optics, Networking, SMATV/MATV, and Telecom Power Solutions.

With 20+ years of SATCOM and RF experience within our technical leadership capability and GVF-certified engineering expertise, we provide professional site survey, installation, commissioning, testing, maintenance, troubleshooting, and technical support.

We support telecom operators, OEMs, system integrators, satellite providers, government organizations, UN/NGOs, international contractors, and enterprise clients.

Reliable Engineering. Practical Field Delivery. Long-Term Partnership.

Satellite & Wireless Communications Home page

Professional VSAT, satellite earth station and wireless communication solutions, including installation, commissioning, RF troubleshooting, maintenance and technical support. **Learn more**

Satellite & Wireless Communications

SATELLITE & WIRELESS COMMUNICATIONS

Reliable Connectivity. Professional Engineering.

GIX Nexus Telecom and Power provides professional satellite and wireless communication solutions for remote, enterprise, institutional, and telecommunications environments.

Our technical teams support the complete service lifecycle, from **site survey and installation to commissioning, troubleshooting, maintenance, and technical support.**

Our Capabilities

- VSAT Installation & Commissioning
- Satellite Antenna Alignment
- Earth Station Installation & Support
- RF Equipment Installation & Testing
- Satellite Modem & Baseband Support
- Wireless Link Installation
- Point-to-Point & Point-to-Multipoint Solutions
- Link Troubleshooting & Optimization
- Preventive & Corrective Maintenance
- Equipment Upgrade & Replacement
- Site Survey & Technical Assessment

End-to-End Technical Support

Site Survey → Installation → Testing → Commissioning → Handover → Maintenance

Reliable Connectivity. Practical Field Engineering.

RF Engineering homepage

Professional RF installation, testing, measurement, troubleshooting, commissioning, and maintenance for satellite and telecommunications systems. [Learn more](#)

RF ENGINEERING

Precision RF Engineering. Reliable Performance.

GIX Nexus Telecom and Power provides professional RF engineering services for satellite communications, wireless systems, telecommunications infrastructure, and RF equipment.

Our Capabilities

- RF Equipment Installation & Replacement
- Antenna & Feed-System Support
- RF Signal Testing & Measurement
- Spectrum Analysis & Signal-Level Testing
- RF Fault Isolation & Troubleshooting
- BUC, LNB & RF Chain Support
- RF Link Testing & Commissioning
- Interference Troubleshooting
- Preventive & Corrective Maintenance
- System Performance Verification
- Technical Reporting & Documentation

Telecommunications Infrastructure

Outdoor & indoor telecom infrastructure installation, equipment integration, commissioning, maintenance, and field technical support. [Learn more](#)

Telecommunications Infrastructure

GIX Nexus provides professional installation, integration, commissioning, and maintenance services for telecommunications infrastructure, supporting both indoor and outdoor network environments.

Our capabilities include:

- Outdoor telecommunications infrastructure
- Indoor telecom installations
- Telecom equipment installation and integration

- Cabinet, rack and shelter installation
- Structured cabling and cable management
- Grounding and bonding
- Site preparation and installation support
- Testing and commissioning
- Preventive and corrective maintenance
- Technical troubleshooting and field support

Reliable Infrastructure. Professional Installation. Responsive Field Support.

Optical Fiber Solutions home page

Professional fiber optic installation, splicing, testing, troubleshooting, maintenance, and connectivity solutions for telecommunications and network infrastructure. [Learn more](#)

Optical Fiber Solutions

GIX Nexus provides professional optical fiber installation, testing, commissioning, maintenance, and troubleshooting services for telecommunications and network infrastructure.

Our capabilities include:

- Fiber optic cable installation
- Fiber routing and infrastructure deployment
- Fiber termination and splicing
- OTDR and fiber link testing
- Fiber fault identification and troubleshooting
- Fiber maintenance and repair
- Patch panel and distribution-frame installation
- Cable management, labeling and documentation
- Testing, commissioning and handover

Network Infrastructure home page

Professional LAN/WAN, structured cabling, network equipment, wireless infrastructure, installation, testing, and maintenance solutions. [Learn more](#)

Network Infrastructure

GIX Nexus provides reliable network infrastructure solutions for enterprise, institutional, telecommunications, and remote-site environments.

We support the installation, integration, testing, and maintenance of network infrastructure designed for secure, reliable, and efficient connectivity.

Our capabilities include:

- LAN/WAN infrastructure
- Structured cabling
- Network rack and cabinet installation
- Switches, routers and network equipment installation
- Wireless network infrastructure
- Network equipment integration and configuration support
- Cable management and labeling
- Network testing and troubleshooting
- Preventive and corrective maintenance
- Site survey and technical support

Reliable Networks. Professional Infrastructure. Seamless Connectivity.**SMATV / MATV Solutions Homepage**

Professional satellite and TV distribution systems for hotels, residential buildings, commercial properties, institutions and hospitality facilities—from installation and commissioning to maintenance and support.

SMATV / MATV SOLUTIONS**Professional Satellite & TV Distribution Systems**

GIX Nexus Telecom and Power delivers professional **SMATV and MATV solutions** for hotels, residential buildings, commercial properties, institutions, hospitality facilities, and multi-dwelling developments.

We provide complete technical support from **system design and site assessment through installation, testing, commissioning, and ongoing maintenance**, ensuring reliable signal distribution and consistent viewing quality throughout the facility.

Our Capabilities

- SMATV system installation
- MATV system installation
- Satellite dish and antenna installation
- Headend equipment installation and configuration
- Satellite signal distribution
- TV distribution networks
- RF signal testing and optimization
- Multiswitch and distribution equipment installation

- Coaxial cabling and termination
- System troubleshooting and fault isolation
- Preventive and corrective maintenance
- System upgrades and expansion
- Testing, commissioning and handover

Telecom & Power Solutions home page

Telecom DC power, UPS, battery backup, power distribution, installation, testing, maintenance, and technical support for critical communication infrastructure.

TELECOM & POWER SOLUTIONS

Reliable Power for Critical Telecommunications Infrastructure

GIX Nexus Telecom and Power provides professional telecom power and backup-power solutions designed to support reliable operation of telecommunications, satellite, networking, and remote-site infrastructure.

Our Capabilities

- Telecom DC power systems
- UPS installation and support
- Backup-power solutions
- Battery systems and battery backup
- Power distribution and equipment integration
- Telecom equipment power installation
- Power-system inspection and testing
- Cabling and termination support
- Preventive maintenance
- Corrective maintenance and troubleshooting
- Power-system upgrades and replacement
- Remote-site power support

Reliable Power. Resilient Communications. Professional Field Support.

Installation & Maintenance Home page

Professional site survey, installation, commissioning, preventive and corrective maintenance, troubleshooting, and technical support for telecom, SATCOM, RF, fiber, networking, and power systems.

INSTALLATION & MAINTENANCE

GIX Nexus Telecom and Power provides end-to-end installation, commissioning, maintenance, and technical support services for telecommunications, satellite, RF, fiber optic, networking, and power infrastructure.

Our Services

- Site survey and technical assessment
- Equipment and infrastructure installation
- Antenna and VSAT installation
- RF equipment installation
- Fiber optic installation and support
- Network equipment installation
- Telecom power installation support
- System integration and commissioning
- Testing and performance verification
- Preventive maintenance
- Corrective maintenance
- Fault diagnosis and troubleshooting
- Equipment replacement and upgrades
- Emergency field support
- Technical reporting and documentation
- System handover and acceptance support

Preventive Maintenance

We provide planned inspections and maintenance to identify potential issues before they lead to service interruptions, helping improve equipment reliability and operational continuity.

Corrective Maintenance

Our field teams support fault identification, troubleshooting, equipment replacement, repair coordination, testing, and service restoration.
